INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

MELODY

Garden Pea

EXHIBIT AOrigin and Breeding History of the Variety

MELODY, a late Perfection type freezing pea, was derived from the following hand pollinated crosses:

TARGET X (WASATCH X BARTON'S #16)

Barton's #16 was a release of the New York Agricultural Experiment Station, Geneva, New York. The final cross of the pedigree was made during the fall of 1963, and the following series of selections were subsequently made:

Year	Generation	Plot *	Harvested
1964	F2	641135	11 single plant selections
1965	F3	651298	4 single plant selections
1966	F4	66757	5 single plant selections
1967	F5	67990	3 single plant selections
1968	F6	68674	3 single plant selections
			12 ounces of bulk seed from plot.

* The plots listed above were only one of the several that were increased from each previous generation.

Four ounces of the 12 ounces of seed harvested from plot 68674 were planted as plot 69255 in 1969 and the three single plant selections were increased as plots 69655 through 69657. The single plant increase of plot 69657 was judged the best of the three single plant selections, and the seeds from this plot were harvested and increased during 1970 as plot 70423 and yielded 57 pounds of seeds which were planted again in 1971 as plot 71449 and 2,010 pounds of seeds were harvested. This seed was released for production increase in 1973 and is the origin of our current production. Single plant selections were harvested during the 1970 season and these have been increased as reserve pure lines to maintain the variety.

During 1973, one off-type in a 200,000 plant population was removed. This rogue type had larger and darker leaves and was of later season.

MELODY

Garden Pea

EXHIBIT BBotanical Description of the Variety

MELODY is a late Perfection freezer type pea of 71 days maturity, which is two days later than Dark Skin Perfection and one day later than Aurora (Rogers Brothers Company). It has an average berry sieve size of 4.00 which is one sieve size smaller than Dark Skin Perfection. The vine is 76 cm tall, which is 10 cm shorter than Dark Skin Perfection, and the vine is very determinate as well as having a determinate pod set. The leaves are of moderate size and it is of an open vine type. In replicated yield trials during 1972, 1973, and 1974, Melody yielded 70%, 110% and 70% of Dark Skin Perfection respectively, in Rogers Brothers Company Southern Idaho yield trials.

MELODYEXHIBIT D - REVISED

Date Indicative of Novelty

"MELODY" most closely resembles "AURORA", but differs in having darker, more uniform berry color, is one day later in freezing maturity, has a lesser degree of resistance to Enation Mosaic Virus and averages 18 percent more double pods.

EXHIBIT E

Statement of Applicant's Ownership

Rogers Brothers Company, P. O. Box 2188, Idaho Falls, Idaho, believes it to be the sole, original and first breeder of the "MELODY" variety of Garden Pea for which it solicits a certificate of protection.
